

NATURAL STONE NEWS

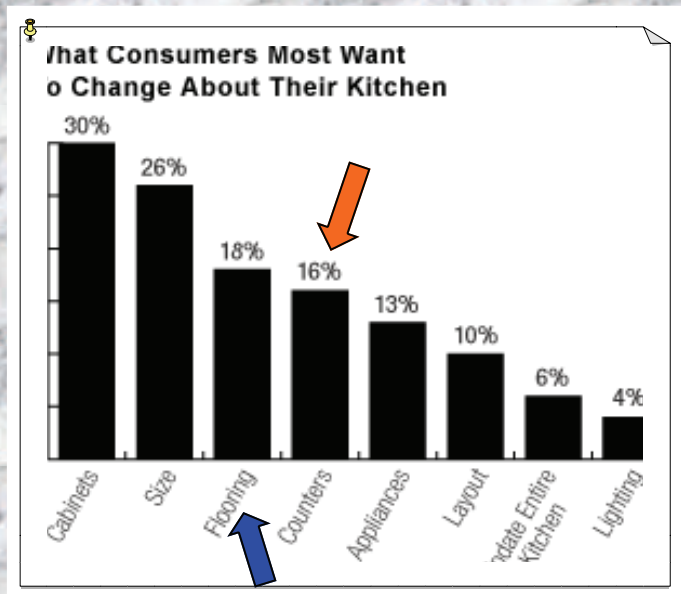

FROM YOUR LARGEST NATURAL STONE SUPPLIER IN WESTERN CANADA

2005 will be a big year for the building industry in British Columbia and Alberta. Forecast shows a 6% to 7% hike in house prices in Edmonton and Calgary and at least 3% in Greater Vancouver.

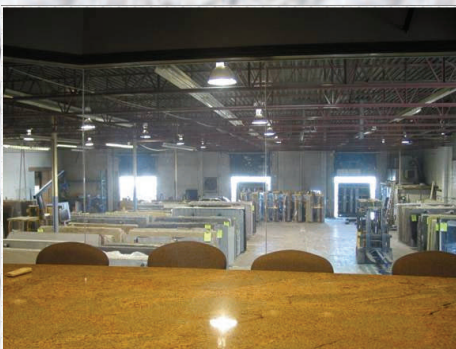

Home owners will seriously consider a facelift for their more valuable homes now. So get prepared for the coming peak demand. A recent research shows that about 35% of the consumers who are planning for a renovation will change their countertops and flooring. With the growing affordability of stone for residential countertops, more and more fabricators are stating that natural stone has become a cost-effective option when compared to man-made counter surfaces. More over, people are seeing the beauty of natural stone surfaces in their friends and relatives' residence; it has become a trend, an IN-THING. . With dozen of TV home and garden shows, customers are well informed and educated and are more comfortable to get some natural stone in home.
