**New Website designed by the stone professionals for the stone professionals**

DMK STONE has been your natural stone warehouse serving western Canada and the US Northwest for over 6 years now. Thanks to the recognition from customer like you, DMK STONE's business has increased 6 folds, with a constant stocking of 200,000 square feet in 135 plus colours and species from Brazil, India, Greece, China, Ukraine, Taiwan and many other parts of the world. Other products in stock or arriving soon are tiles of granite, marble, slate, natural stone basin, artistic mosaic and professional stone sealers and cleaners. As our staffs are instructed to practice strict "warehouse for you" ethics, more and more fabricators, designers, kitchen companies and other warehouse operations are sending their customers to DMK STONE.

With our goal always in mind, we are now updating this website to better serve our customers so they have easy access to our products, colours and prices. In the near future we will open up real-time inventory to customers with frequent transactions. You can use this website as if you are browsing your own inventory. Let us be your backyard warehouse and be a partner in your successful business.

**Now you can view or hold material online anytime**
